Kigali, Rwanda

PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in frontend development, UI/UX design, and full-stack web technologies. Experienced in building responsive and user-focused applications using JavaScript, modern web frameworks, and database systems. Professional experience at Scopex and internship experience at Energy Utility Corporation Limited (EUCL). Passionate about building scalable digital learning platforms with intuitive user experiences and contributing to innovative technologies that improve education and accessibility.

TECHNICAL SKILLS

Programming: JavaScript, Java, PHP, HTML5, CSS3, Python
Frameworks & Technologies: React.js, Node.js, Bootstrap, REST APIs, Django, Laravel, Next.js, Express
UI/UX: Figma, Wireframing, Prototyping, Design Systems
Databases: MySQL, PostgreSQL , MongoDB, Stored Procedures & Triggers
Tools: Git, GitHub, VS Code, Docker
Concepts: Object-Oriented Programming, Software Development Lifecycle, Debugging, System Design

PROFESSIONAL EXPERIENCE

Software Developer – Scopex

• Developed and maintained responsive web applications focusing on usability and performance.
• Designed user-friendly interfaces aligned with modern UX/UI principles.
• Integrated frontend components with backend APIs and optimized application workflows.
• Participated in debugging, testing, and improving application performance.

Software Development Intern – Energy Utility Corporation Limited (EUCL)

• Assisted in development and maintenance of web-based systems supporting company operations.
• Implemented frontend interfaces and supported database integration.
• Assisted in refactoring backend modules to improve system performance and reliability.
• Collaborated with technical teams to troubleshoot and improve digital system performance.

PROJECTS

Uganda Railways Online Ticket Reservation System – Java, PHP, MySQL
• Developed an online railway ticket booking platform with authentication and reservation management.
Heart Disease Prediction Application – Java, Machine Learning Concepts
• Built a predictive system analyzing medical data to estimate heart disease risk.

EDUCATION

Bachelor of Software Engineering – International University of East Africa
Diploma in Computer Science – International University of East Africa
